WORK EXPERIENCE

2020-05-01 till today

Architect / Lead Go Backend Developer at [Form3](#):

Design, create, build and maintain core services, from infrastructure requirements to software architecture. Identify and fix weak points in DevSecOps processes, tools and practices. Build reliable, resilient and high speed microservices. Perform as Advisor in Decision Boards and liaise with Product Owners and C-level executives to understand the business needs and design solutions according to those needs. Ensure security and UK/EU compliance on the treatment of data. Ensure that running services are properly secured, monitored and risks have been mitigated.

2020-03-01 till 2020-04-30

Senior Solutions Architect / DevOps Advocate at [Everis](#):

Liaise with clients and business representatives to understand the needs of business. Liaise with other professionals to design solution architecture for businesses and clients. Ensure compliance to solution architectural design in the implementation of projects. Provide architectural guidance to the project team. Render consulting and technical support services on project implementation to the project team. Explain technical issues and IT solution strategies to stakeholders and other IT professionals. Keep accurate record of materials used, expected deliverables, and milestones achieved. Ensure that solution milestones are accomplished at the right time. Guide the activities of the solution architecture unit to ensure timely completion of projects. Ensure that solution architecture (software and programs) designed are in sync with business needs and hardware. Review the proposal of vendors and suppliers to ensure that quality inputs are delivered at the least possible cost. Monitor the activities and coach programmers or developers on IT solution projects. Identify and mitigate existing business risk or risks associated with solution architecture. Create an inspiring team environment with an open communication culture. Set clear team goals. Delegate tasks and set deadlines. Oversee day-to-day operation. Monitor team performance and report on metrics. Motivate team members. Discover training needs and provide coaching. Listen to team members' feedback and resolve any issues or conflicts. Recognize high performance and reward accomplishments. Encourage creativity and risk-taking. Suggest and organize team building activities

2019-09-01 till 2020-02-028

Chief Cloud Solutions Architect / DevOps Advocate at [Hitachi Vantara](#):

Partner with the sales team to design solutions for customers, drive Multi Cloud adoption and revenue. Educate customers of all sizes on the value proposition of Multi Cloud Solutions. Establish credibility and build deep relationships with senior technical individuals within customers to enable them to be cloud advocates. Participate in deep architectural discussions to build confidence and ensure customer success when building new and migrating existing applications, software and services on a Multi Cloud environment. Conduct deep-dive "hands-on" education/training sessions to transfer knowledge to customers considering or already using Cloud. Capture and share best-practice knowledge amongst the different Cloud communities. Author or contribute to Multi Cloud customer-facing publications. Present sessions at different Cloud industry conferences. Technical liaison between customers, service engineering and support teams. Help to build, drive and augment the EMEA Solution Architect's Team. Support HR in recruitment sessions. Participate in interviews with candidates for various technical positions. Define the strategy on Cloud Solutions for the engagement of the different Partners, both upstream and downstream. Participate in Community Outreach programs. Have a strong presence in different summits, conferences and shows in the industry, delivering talks and engaging potential and actual customers.

2017-11-01 till 2019-08-30

Cloud & Hybrid Technologist, Lead Technical Consultant at [Fujitsu Global](#):

I'm responsible for successfully on-boarding and guiding both new and existing customer through their transition and digital journey, including proof of concepts, technical demonstrations of solutions and contributions to the ongoing innovation of the Cloud/Hybrid/DevOps portfolio in general. I deliver technical cloud and hybrid demonstrations, provide 1-2-1 technical guidance to new customers on their chosen solutions, ensure customers are aware of Fujitsu's wider Digital Transformation Services and Products offerings, provide support to Fujitsu's EMEA Hybrid IT Team and contribute to the creation and execution of Learning And Development material.

2012-11-01 till 2017-11-01

Cloud Architect & Engineer / DevOps at [Altoros](#):

Engage multidisciplinary projects that applies an agile process to system architecture, software development, testing and deployment. Automate tasks required to maintain a secure and up to date operational environment, eventually supporting the engineering team with hands-on coding. Design, implement and test architectural blueprints to support a solid but flexible infrastructure to ensure the best possible outcome in every situation. Develop, improve, maintain, and document infrastructure management systems working with other teams to build, test and roll out systems. Help with deployment and testing infrastructure, supporting the implementation of Continuous Integration, help refine the development processes while interacting constantly with Software Engineers and Stakeholders. Train end users, Stakeholders and software developers in the different aspects of the best practices and tools used to achieve the level of confidence necessary to have a fully automated software deployment platform.

2011-02-01 till 2012-09-30
